

In the Drawings:

Objections to the drawings are corrected in the specification, as presented below. Reference signs 80, 82, 202, 210, 250, and 256 have been added to the specification. The referencing phrase "132 through 140" has been replaced in the specification to include only the reference signs present in Figure 12.

Please note that reference sign 102 is present in the specification on page 24, line 18 which states:

"With reference to Figure 9, the next step is to perform phase acquisition (step 102)."

It is believed that the objections to the drawings are hereby overcome.
